Here is a quick guide to finding your poster in the symposium program. As an example we will find Justine Shiau's poster. First, find the poster in the PDF program or abstract book.

Note the poster number for Justine, P8-03. "P" indicates this is a poster, the "8" tells us what floor it is on, and the "03" tells us the table number. To find this poster table, click on Floor 8 on the left of the Remo conference screen, then find table three in the main floor area. That's it!
