

# High Quality Multicolor Flow Cytometry Seeing the Whole Picture Through Full Spectrum Profiling (FSP™)

[www.cytexbio.com](http://www.cytexbio.com)

The Aurora is a novel flow cytometer that expands the breadth of applications currently available on conventional cytometers. The system incorporates a new technology that maximizes the benefits of spectral flow cytometry.

- Up to five lasers and 64 fluorescence channels of detection over the full spectrum
- One configuration for all assays
- Autofluorescence Extraction
- Small particle detection
- Reference control library for reusing controls
- Compatibility with existing panels with easy options for expansion of parameters
- 40+ Colors - [See Cytometry Part A OMIP-069](#)

**Date: Friday January 28<sup>th</sup>, 2022**

**Time: 1:00 – 2:00 pm EST**

**Location: GoToWebinar**

**Presenter: Christopher Fleming PhD**
